

*It was a great opportunity to participate in the Lucerne Graduate Academy for Law and Economics 2022. The discussions were of a very high level and the speakers brought a lot of content. For the preparation of my PHD dissertation, the presentation and discussion of my paper was essential, as I received several comments and suggestions that I could apply and refine its scope. I was also delighted by all my colleagues – people from various places around the world with different backgrounds who could add to each other's research.*

*However, I might highlight the organization of the event. A very well put together schedule, interspersing classes with moments of discussion and leisure. We were able to visit the beautiful city of Lucerne and also to meet other colleagues, in a great networking exercise. Everything worked flawlessly, nothing out of place, I thank professor Klaus Mathis for this amazing Academy and all his team, especially Alexander Baumann, who was always taking the lead in the organization.*

*Lucerne Graduate Academy for Law and Economics 2022 was a great experience, very enriching and I recommend it to everyone who has a chance to participate!*
